Requirement Analysis

Data Flow Diagram & User Stories

Date	17 February 2026
Team ID	LTVIP2026TMIDS37778
Project Name	Laptop Request Catalog Item

Data Flow Diagram (DFD):

A Data Flow Diagram (DFD) is a graphical representation of how data moves through a system. It shows the flow of data between processes, external entities, and data stores without describing internal coding logic.

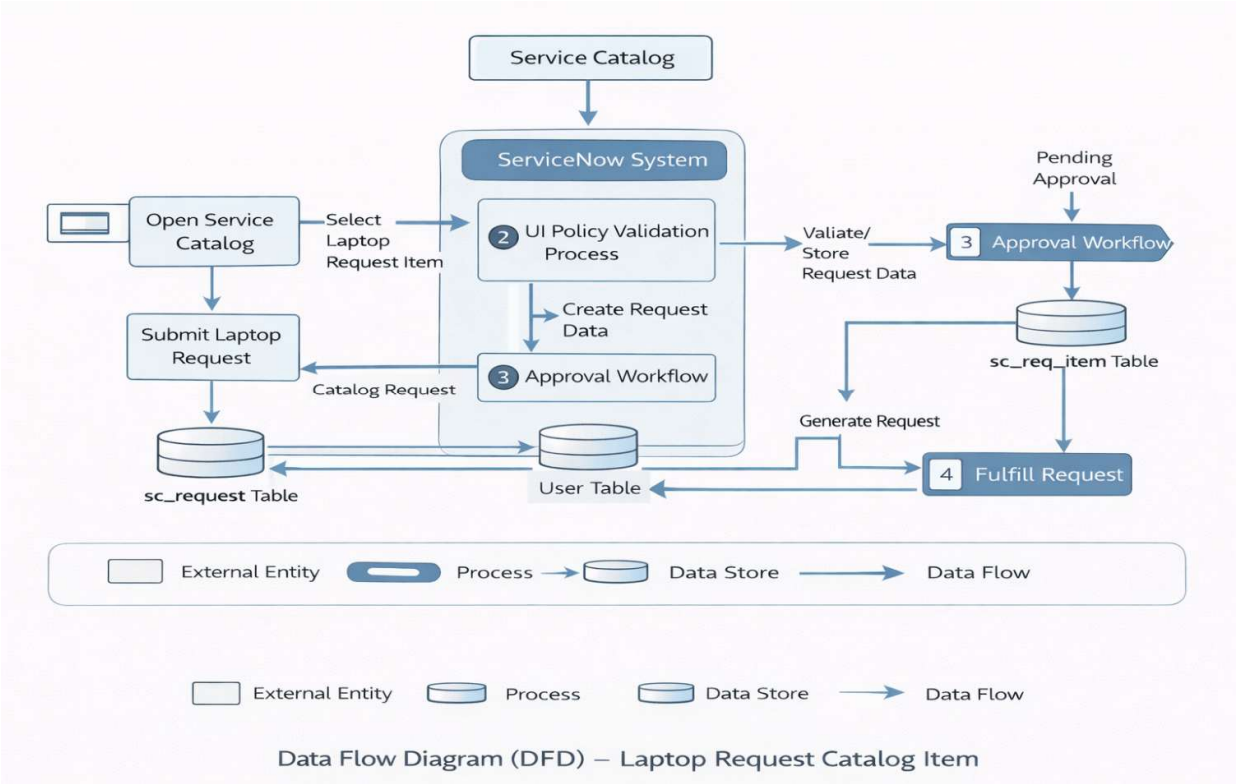
Why Use a DFD?
• Provides a clear understanding of how the ServiceNow system handles request data
• Helps analyze catalog workflows and approval processes
• Identifies inputs, outputs, processing steps, and data storage
• Useful for documentation and system design

Components in a DFD
• **External Entities:** Users interacting with the Service Catalog (Employee, Admin)
• **Processes:** Catalog Item Submission, UI Policy Processing, Approval Workflow, Request Generation
• **Data Stores:** ServiceNow Tables (User Table, Request Table, RITM Table, Catalog Item Table)
• **Data Flows:** Movement of request data between users, processes, and database tables

Example (Simplified Flow for ServiceNow Laptop Request)
Employee → [Open Service Catalog] → [Select Laptop Request Item] → [Catalog Item Form]
Employee → [Submit Request] → [UI Policy Validation Process] → [ServiceNow System]
ServiceNow System → [Create Request] → [sc_request Table]
ServiceNow System → [Create Requested Item (RITM)] → [sc_req_item Table]

Manager → [Approval Process] → [Approval Table]
Admin → [Fulfill Request] → [Update RITM Status] → [Closed Request]

Data Flow Diagram (DFD):



User Stories Table:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Catalog Item Creation	USN-1	As an employee, I can access the Laptop Request catalog item from the Service Catalog.	I can view the Laptop Request form.	High	Sprint-1
Employee	Form Submission	USN-2	As an employee, I can submit a laptop request by filling required fields.	Request is successfully submitted and confirmation is shown.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Dynamic Form Behavior	USN-3	As an employee, when I select “Additional Accessories”, the Accessories Details field becomes visible and mandatory.	Field visibility and mandatory conditions work correctly.	High	Sprint-1
Employee	Reset Function	USN-4	As an employee, I can reset the form fields using a Reset button.	All entered values are cleared.	Medium	Sprint-2
Manager	Approval Workflow	USN-5	As a manager, I can approve or reject the submitted laptop request.	Approval decision updates request status.	High	Sprint-2
Admin	Update Set Export	USN-6	As an admin, I can export the update set as an XML file.	Update set is downloaded successfully.	High	Sprint-2
Admin	Update Set Import	USN-7	As an admin, I can import and commit the update set into another instance.	Update set is successfully previewed and committed.	High	Sprint-2
Admin	Request Management	USN-8	As an admin, I can track and manage all submitted laptop requests.	I can view and update request records.	Medium	Sprint-2
