Define Problem Statements

Date	17 February 2026
Team ID	LTVIP2026TMIDS37778
Project Name	Laptop Request Catalog Item

Customer Problem Statement:

Problem Statement 1:
I am Ramesh, a newly joined employee in the organization.
I'm trying to request a laptop to start my work.
But there is no structured system to submit and track my request.
Because of this, I need to send emails manually and wait without knowing the approval status.
Which makes me feel confused and delayed in starting my assigned tasks.

Problem Statement 2:
I am an IT administrator responsible for asset allocation.
I'm trying to manage and approve multiple laptop requests efficiently.
But requests are coming through emails and informal communication.
Because of this, it becomes difficult to track approvals, maintain records, and ensure proper asset allocation.
Which makes me feel overwhelmed and concerned about mismanagement of company assets.

PS No.	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Ramesh, a newly joined employee	request a laptop to start my work	there is no structured system to submit and track my request	I need to send emails manually and wait without knowing approval status	confused and delayed in starting my tasks
PS-2	an IT administrator responsible for asset allocation	manage and approve multiple laptop requests efficiently	requests come through emails and informal communication	it becomes difficult to track approvals and maintain proper records	overwhelmed and concerned about asset mismanagement
